

Krüger Industrieautomation GmbH

Krüger Industrieautomation GmbH is a family owned company based in Wipperfürth, North-Rhine Westphalia/Germany.

We focus in our business in factory automation, robotics and we are manufacturer for rewinder technology and packaging machines.

Since 1998 Krüger Industrieautomation GmbH offers industrial systems and control technology, nationally and internationally.

Our range of skills covers more than standard applications.

In recent years our team of engineers and technicians has developed and installed various applications and solutions for specific industry segments.

Our clients are mainly medium-sized companies that want to improve their quality and efficiency of their production processes by using modern systems and robots.

The Krüger Industrieautomation GmbH also offers a large of selected used robots from all major brands.

Those can be integrated at customers in existing systems, or also, because of their robustness, in new applications with short lead times.

Overview of machines

- automatic film and foil rewinder
- box packing machines
- collecting and packing machines
- roll wrapping machines
- complete production line for household foils
- special purpose machines
